PROFESSIONAL SUMMARY

Frontend-first Developer with 3+ years of experience building production web applications using React.js, Next.js, Angular, and TypeScript, with hands-on backend exposure building 20+ REST APIs using Node.js, Express.js, and MongoDB on a live production platform. Led a framework migration from Angular to Next.js to resolve real performance issues, improving Lighthouse scores by 167% through SSR. Experienced in building configurable RBAC systems, accessible (WCAG/ARIA) interfaces, and 80+ multi-step forms with conditional validation across enterprise projects, collaborating within Agile/Scrum teams. Comfortable with Azure fundamentals (repos, Blob Storage, CI/CD pipelines). Daily user of AI-assisted development tools (GitHub Copilot, ChatGPT, Claude, Cursor) to accelerate coding, debugging, and codebase navigation.

TECHNICAL SKILLS

Frontend Libraries & Frameworks:	React.js, Next.js, React Hooks, React Router, Angular (v12–v18)
Backend (hands-on, BSI project):	Node.js, Express.js, MongoDB, Mongoose, REST API Design, Multer
Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
State Management & Data Flow:	Redux, Redux Toolkit, Context API, RxJS, NgRx, Axios, RESTful APIs
Authentication & Authorization:	JWT, Role-Based Access Control (RBAC)
Styling & UI Components:	Tailwind CSS, Shadcn UI, Bootstrap, PrimeNG, Angular Material
Data Visualization & Tables:	TanStack Table (React Table), Chart.js
Payments & Integrations:	Razorpay Payment Gateway
Accessibility:	WCAG 2.1, ARIA, Keyboard Navigation
Performance & Rendering:	React.memo, useCallback, useMemo, Server-Side Rendering (SSR), Lazy Loading, OnPush Change Detection
Cloud & DevOps:	Azure (Repos, Blob Storage, CI/CD Pipelines)
AI-Assisted Development:	GitHub Copilot, ChatGPT, Claude, Cursor, DeepSeek
Process:	Agile/Scrum (Sprints, Standups)
Developer Tools:	Git, GitHub, VS Code, npm, Postman, Vite, Webpack

WORK EXPERIENCE

Soluzione IT Services Pvt. Ltd.

Frontend Developer (React.js / Angular)

Bhopal, MP

June 2023 – July 2026

React.js & Next.js Development

- Owned complex accreditation and workspace features end-to-end using React.js and TypeScript, building 30+ nested reactive forms with conditional field validation and a configurable RBAC system securing access for 5+ administrator roles.
- Migrated the Boarding Schools of India platform from Angular to Next.js to resolve real performance bottlenecks, using Server-Side Rendering and asset optimization to raise Lighthouse scores from 30 to 80+ (167% increase).
- Designed modern admin dashboards using Tailwind CSS and Shadcn UI; integrated TanStack Table for high-speed sorting, pagination, and search.
- Used AI-assisted development tools (GitHub Copilot, ChatGPT, Cursor) daily for debugging, refactoring, and navigating legacy code during framework migrations.
- Optimized UI rendering using React.memo, useCallback, and useMemo, reducing unnecessary re-renders on heavy-data views.

- Delivered WCAG/ARIA-compliant accessible interfaces and collaborated within Agile/Scrum ceremonies (sprints, standups) across cross-functional teams.

Angular Development

- Designed modular Angular frontend structures with 30+ reusable UI components, pipes, and directives across multiple projects, saving 25% development time.
- Developed nested Reactive Forms with FormArrays and custom validators, using RxJS (switchMap, debounceTime) and NgRx for state management, connecting REST APIs via HTTP interceptors and secure JWT token handling.
- Rendered data visualization layouts with Chart.js for real-time business performance analysis.

Backend Development (Boarding Schools of India)

- Developed 20+ REST APIs using Node.js and Express.js, backed by MongoDB, for a platform serving 700+ schools, including JWT-based authentication and Razorpay payment gateway integration.
- Implemented secure file uploads using Multer with Azure Blob Storage for document/media handling.

PROJECTS

Boarding Schools of India | *Next.js (migrated from Angular), TypeScript, Node.js, Express.js, MongoDB, Razorpay*

- Full-stack platform serving 700+ schools; originally built in Angular, later moved to Next.js to resolve performance issues, achieving a 167% Lighthouse score improvement via SSR.
- Engineered 20+ backend REST APIs (Node.js, Express.js, MongoDB) covering search, listings, and authentication; implemented JWT auth and Multer + Azure Blob Storage for file uploads; connected Razorpay payment gateway end-to-end (backend order/payment verification and frontend checkout flow).
- Created 20+ advanced search and inquiry forms with real-time validation, improving conversion rates.

JAZ-ANZ – International Accreditation | *Angular, RxJS, NgRx, PrimeNG, RBAC*

- Engineered a multi-step accreditation system with 20+ conditionally-rendered Reactive Forms and granular RBAC supporting 4+ user types.
- Connected 30+ REST APIs using RxJS-driven data flows and NgRx state management.
- Developed a reusable PrimeNG component library ensuring UI consistency across 20+ screens.

AccredOne | *React.js, TypeScript, Redux Toolkit, REST APIs*

- Developed 30+ configurable workflow forms and a custom RBAC matrix for granular, field-level permissions, using Redux Toolkit and Context API for centralized state and real-time REST API data sync.
- Optimized rendering using React.memo, useCallback, and useMemo, reducing re-renders on heavy-data views.
- Delivered a WCAG/ARIA-accessible interface with keyboard navigation support.

Ensurite – Insurance Platform | *Angular, TypeScript, Chart.js, REST APIs*

- Built 15+ multi-field reactive forms digitizing legacy insurance workflows, reducing customer data entry errors by 60%.
- Consumed RESTful services for real-time policy updates; built an underwriting analytics dashboard using Chart.js.

EDUCATION

Technocrats Institute of Technology

Bachelor of Technology in Electronics and Communication

Bhopal, M.P., India

2019 – 2023
