PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of experience building production web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs with JWT authentication, Role-Based Access Control (RBAC), and Mongoose data modeling, alongside third-party integrations such as Razorpay and Azure Blob Storage. Frontend background in TypeScript, Redux Toolkit, Context API, and Server-Side Rendering (SSR), with delivered work on a school discovery and inquiry platform serving 700+ schools.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Context API, React Hooks, Tailwind CSS, Shadcn UI, Responsive Web Development

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Multer

Database: MongoDB, Mongoose, Schema Validation

Integrations & Storage: Razorpay, Azure Blob Storage, Axios, Postman

Performance & Rendering: Server-Side Rendering (SSR), Lazy Loading, Code Splitting, React.memo, useMemo, useCallback

Additional Experience: Angular, RxJS, NgRx, Angular Material, PrimeNG, Chart.js

Tools: Git, GitHub, Vite, Webpack, npm

WORK EXPERIENCE

Soluzione IT Services Pvt. Ltd.
Bhopal, MP

Software Engineer L3
June 2023 – July 2026

- Developed 20+ REST APIs using Node.js, Express.js, and MongoDB for a production platform serving 700+ schools, covering authentication, school listings, search, inquiry, and payment workflows.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) across APIs and protected routes, enabling role-specific workflows for multiple user types.
- Integrated Razorpay payment gateway end-to-end and implemented file uploads using Multer with Azure Blob Storage for persistent media handling.
- Modeled MongoDB collections with Mongoose schemas and validation for listing, inquiry, user, and payment data used across the platform.
- Migrated the production platform from Angular to Next.js using Server-Side Rendering (SSR) and asset optimization, improving the Lighthouse score from 30 to 80+.
- Built complex accreditation and workspace features using React.js, TypeScript, Redux Toolkit, and Context API, including 30+ nested form workflows with conditional validation and configurable RBAC for 5+ administrator roles.
- Optimized rendering on heavy-data views using React.memo, useMemo, and useCallback; delivered WCAG/ARIA-compliant interfaces with keyboard navigation support.
- Built modular Angular frontends with 30+ reusable components, pipes, and directives, reducing development time by 25%; used RxJS, NgRx, and HTTP interceptors with secure JWT handling.

PROJECTS

Boarding Schools of India | *Next.js, TypeScript, Node.js, Express.js, MongoDB, Razorpay*

- Production full-stack platform for school discovery, listings, and inquiry management serving 700+ schools, with public pages rendered via SSR.
- Backend REST APIs built with Node.js, Express.js, and MongoDB/Mongoose support search, listing, authentication, inquiry, and payment workflows, protected with JWT and role-based access.
- Integrated Razorpay for payments and Multer with Azure Blob Storage for uploads; frontend built in Next.js and TypeScript with 20+ advanced search and inquiry workflows using dynamic filtering and client-side validation.

AccredOne | *React.js, TypeScript, Redux Toolkit, Context API, REST APIs, RBAC*

- Accreditation platform supporting role-based access control and configurable field-level permissions for administrators and end users.
- Developed 30+ configurable workflow forms and a custom RBAC matrix, managing complex form state with Redux Toolkit and Context API.
- Integrated REST APIs with centralized state management for data synchronization across multi-step accreditation workflows; delivered a WCAG/ARIA-accessible interface with keyboard navigation support.

JAZ-ANZ – International Accreditation | *Angular, RxJS, NgRx, PrimeNG, REST APIs, RBAC*

- Multi-step accreditation system with 20+ conditionally rendered Reactive Forms and granular RBAC supporting 4+ user types.
- Connected 30+ REST APIs using RxJS-driven data flows and NgRx state management; developed a reusable PrimeNG component library used across 20+ screens.

Ensurite – Insurance Platform | *Angular, TypeScript, Chart.js, REST APIs*

- Digitized legacy policy and underwriting workflows with 15+ multi-field Reactive Forms integrated with REST APIs, reducing customer data-entry errors by 60%; built a Chart.js underwriting analytics dashboard.

EDUCATION

Technocrats Institute of Technology — **Bhopal, M.P., India**
Bachelor of Technology in Electronics and Communication — *2019 – 2023*
